Dear Classroom Teacher,

At University of Illinois Extension, we are here to be a resource and partner. You care about youth development, and so do we.

You may know Illinois Extension best for 4-H projects like cows, corn, and cooking, and while those are some of the projects our youth enjoy, we have taken a more STEM-centric direction with plenty of emphasis on career and college readiness as well.

Please accept these materials and video lesson as a free, fun learning activity for your students.

OUR ASK: Think of University of Illinois Extension as a resource for your classroom. We offer curriculum and materials on various topics, such as robotics, SEL, hydroponics, and more!

If you are interested in partnering on a project, have a special request, or would like more information, please contact us.

The video lesson is live as of April 15.

Video link: go.illinois.edu/WindmillLesson or scan the QR Code

Kit Includes:

- Student Supplies
- Lesson Plan from the 4-H Renewable Energy Unit
- 1 flyer for the adult Master Naturalist program
- Student fliers for the Jr. Master Naturalist program

Windmill Video

Sincerely,

Amber Heern

Youth Development Educator
