

## University of Illinois Extension Mobile Science Laboratory Parking Map

**Directions:** Please clearly draw a map of your school along with major roads and landmarks that will help the driver deliver the Mobile Lab to its correct location.

- Indicate on the map where on your campus the driver should park the vehicle.  
*The space needs to be 40 feet long, on a hard level surface, not in a fire zone, and not on a Chicago city street.*
- If the mobile lab is going to be parked behind locked gates please make arrangements to have the gates opened 1 hour prior to the first scheduled class
- In the event of inclement weather please clear a walkway to the Mobile Lab
- If the parking spot chosen by the school is deemed inappropriate or inaccessible, the Mobile Lab driver reserves the right to select another parking spot or to cancel the program.
