OrganWise Guys and *Serving Up MyPlate* lessons are being held at the two highest need elementary schools in Boone County: Washington and Perry. The older students' nutrition lessons have been turned into fun games during their physical activity time. This year I have had students from the OrganWise Guys program approach me each week and tell me that have switched from chocolate to white milk at lunchtime.

Perry Elementary School's fourth grade class will be growing herbs and vegetables indoors this spring. A hydroponics system was purchased using a Master Gardeners donation to the gardening program for the school. This will allow the students to witness the entire growing process, from seeds to harvest. The outdoor garden will still be planted for a fall harvest.
